

Michael Beirne

msb2259@columbia.edu // michaelbeirnee.github.io/re/index.html

EDUCATION

Columbia University, Columbia College – New York, NY

May 2028

Major(s): Computer Science & Mathematics - *GPA: 3.50; SAT 1530 (Math 790)*

Extracurriculars: *BlackGen Capital, BLK Capital Management, Columbia EESA, Putnam Seminars, National Society of Black Engineers*

Honors & Awards: Dean's List, American Association of Blacks in Energy Scholarship, Ron Brown Scholar Program – Navigator Scholarship, Columbia Named Scholar

SKILLS

Languages: Java, C, Python, JavaScript, TypeScript, CSS, HTML, JSON, SQL, C++, Assembly

Technologies: Git, Linux, Docker, Kubernetes, React, Bash, AWS (EC2), PostgreSQL, Figma

EXPERIENCE

NASA | Incoming Data Science Research Fellow – New York, NY

Sep – Dec '26

- Incoming Fall 2026 Researcher for the L'SPACE Academy at NASA

Enterall | AI / ML Engineer Intern – New York, NY

Jul '26 – Present

- Currently working on creating bitmap vector drawings with SOTA precision

The Riverside Company | Private Equity Summer Analyst – New York, NY

Jun '26 - Present

- Currently working on evaluating new deals and investment opportunities; sector/equity research analysis, LBO analyses

BeReal | Spring Product Management Extern – New York, NY

May '26

- Analyzed user journeys and engagement flows to identify UX friction points for users
- Designed and prototyped user retention feature to improve MAU through iterative refinements and testing

Capital One | Product & Analytics Intern – Mclean, VA

Jun – Aug '25

- Developed recommendation logic leveraging behavioral embeddings, ranking heuristics, and user interaction analytics
- Collaborated with backend engineers to prototype and iterate product features for user interactions

Capital One | Business Analyst Intern – Mclean, VA

Jun – Aug '24

- Forecasted macroeconomic trends within the commercial real estate sector using proprietary credit card data from Capital One's credit business across 100+ million transactions

Jane Street | Summer Fellow – New York, NY

Jun – Aug '23

- STEM program focusing on the intersection of computer science and mathematics with financial markets
- Combinatorics, number theory, programming, and market-making simulations

PROJECTS

Research Terminal Platform

- Quantitative research platform for market data, OLS factor-exposure models backed by TTL in-memory + on-disk caching layer built on full open-stack

NAND to Tetris Computer System

- Built a complete 16-bit computer system from NAND gates through a working software stack, including HDL logic chips, CPU, memory, assembler, VM translator, Jack compiler, OS library, and emulators

FindJobs – Internship Aggregation Website

- Built full-stack internship aggregation platform using JavaScript, HTML/CSS, and GitHub Pages

RESEARCH

Project Hedgehog - Evals | *AI Researcher*

- Working on evaluating AI model outputs across models to improve instruction, formatting, and response quality

Google – Developer Program | *Developer*

- Codelabs in Google Cloud, Firebase, APIs, and machine learning; built projects using Google developer tools

CLUBS

Columbia Undergraduate Mathematical Modeling Society | *Member*, New York, NY

- Conducted mathematical modeling, estimations, and lectures surrounding how modeling is applied in the sciences

Interests: Tennis, Chess, Reading, Cooking, Trying New Cuisines, Volunteering, Citi Biking through NYC
